

STICHTING ALGEMEEN BUREAU VOOR DE STATISTIEK (ABS – 25 juni 2024)
CONSUMENTENPRIJSINDEXCIJFERS EN INFLATIE OVER mei 2024

Volgens voorlopige cijfers van de Stichting Algemeen Bureau voor de Statistiek (ABS) zijn de consumenten prijzen op maandbasis (basis: april 2016 – juni 2016) in mei 2024 t.o.v. april 2024 gemiddeld met **0.5 % gestegen**. Vergelijken we mei 2024 met mei 2023 dan zijn de consumenten prijzen gemiddeld met **18.6 % gestegen**.

Noot: - Het betreft de prijzen opgenomen van 7 mei 2024 t/m 31 mei 2024.

De consumentenprijsindex (CPI) is een maat voor de gemiddelde verandering in de prijs van een naar kwaliteit en kwantiteit vast pakket aan goederen en diensten bestemd voor consumptieve doeleinden. De CPI wordt vaak “index voor de kosten van levensonderhoud” (COL) genoemd, maar dat is niet geheel juist aangezien in een COL substituties onder meer als gevolg van veranderingen in relatieve prijzen en in smaak WEL en in CPI NIET worden meegenomen.

Er zitten **316 items** in Suriname’s CPI pakket en prijsopnames worden verricht in Paramaribo & Wanica (bij circa 170 meetpunten), Nickerie inclusief Wageningen (bij circa 115 meetpunten), Coronie & Saramacca (bij circa 105 meetpunten), Commewijne (bij circa 120 meetpunten) en in Para (bij circa 120 meetpunten) bij een totaal van **circa 630 meetpunten**.

* Voorlopige cijfers / Provisional figures

Tabel: Consumentenprijsindexcijfers en inflatie 2019 – 2023 / Consumer price indices and inflation 2019 – 2023

| Jr / Yr | Totaalindex jaargemiddelde / All items index annual average | | Totaalindex December / All items index December | |
|-------------|---|----------------------------------|---|-----------------------------------|
| | Index / Index | #Inflatie / Inflation (% change) | Index / Index | # Inflatie / Inflation (% change) |
| 2019 | 140,7 | @#4,4 | 143,4 | 4,2 |
| 2020 | 189,7 | 34,9 | 230,5 | 60,8 |
| 2021 | 301,9 | 59,1 | 370,4 | 60,7 |
| 2022 | 460,2 | 52,4 | 572,5 | 54,6 |
| 2023 | 697,5 | 51,6 | 759,3 | 32,6 |

Basis: april 2016 - juni 2016 / Base : April 2016 - June 2016

@ Noot/Note:10- maandsgemiddelde (Berekeningen zonder de data voor mei en juni) / 10- months average (Computations without data for May and June)

Inflatie berekend uit de indices die gepubliceerd zijn, kan afrondingsverschillen opleveren / # Inflation computed, based on published figures, may produce rounding errors.

Vice –President, Ministers van Financiën & Planning en Economische Zaken, Ondernemerschap & Technologische Innovatie, de Governor van de Centrale Bank alsook de Voorzitter van de Commissie voor de Statistiek krijgen 1-2 uur voorsprong / Vice-President, Ministers of Finance & Planning and Economic Affairs, Entrepreneurship & Technological Innovation, the Governor of the Central Bank as well as the Chairperson of the Commission for Statistics get a 1-2 hours head start.

I(t,t-12) is een gewogen gemiddeld cijfer en CSO's (Statistiekorganisaties) publiceren normaliter slechts I(t, t-12). Vaak is er dan ongenoegen bij diverse partijen.

I(t,t-12) is a weighted average and CSOs (Statistical organizations) normally publish only I(t, t-12). Often there is dissatisfaction among various parties.

Aan de ene kant is er de Overheid, die veeleer van oordeel is dat de inflatie (te) hoog is en onvoldoende de door haar (en de Centrale Bank) getrooste inspanningen tot uiting brengt. Aan de andere kant zijn er de vakbonden (en andere consumenten) die vaak ook van oordeel zijn dat het gepubliceerde gemiddelde cijfer verschilt van wat ze ervaren.

On the one hand there is the Government, which rather thinks that inflation is (too) high and does not sufficiently reflect the efforts it (and Central Bank) made. On the other hand, the Trade Unions (and other consumers) often are also of the opinion that the published average doesn't represent their experience.

Vanaf de maand januari 2019 rapporteert het ABS ook over "prijsbewegingen", waarbij het gedrag van de 316 individuele items in het CPI-pakket beschreven wordt. Naast een maat voor de ligging (gemiddelde) wordt dus ook een indicatie van spreiding (range) gegeven.

Starting from the month January 2019 the ABS also reports on "price movements", describing the behavior of the 316 individual items in the CPI basket. Besides a location measure (mean) an indication is thus also given of the spread/variation (range).

In mei 2024 was de inflatie (CPI mei 2024 vergeleken met CPI mei 2023) 18.6%. Als naar de individuele items wordt gekeken hebben die prijsbewegingen van tussen -65% (Min) en +396%(Max) laten zien.

In May 2024, inflation (CPI May 2024 compared with CPI May 2023) was 18.6%. If the individual items are considered, these price movements have been between -65% (Min) and +396% (Max).

Van juni 2022 t/m mei 2024 hebben de 316 items prijsbewegingen van tussen -65% en + 438% laten zien. I(t,t-12) zelf lag in die periode tussen + 18.6% en +65.4%.

From June 2022 to May 2024, the 316 items showed price movements of between -65% en + 438%. I(t,t-12) itself was between +18.6% and +65.4% during that period.

SURINAME

SURINAME

**Stichting Algemeen Bureau voor de Statistiek: Prijsindexcijfers en inflatie
Paramaribo & Wanica, Nickerie, Coronie & Saramacca, Commewijne en Para
(Basis/Base: Apr - Jun 2016=100)**

Technische Noten

1- Het trekken van conclusies, op basis van de indexcijfers, over prijsniveaoverschillen is niet toegestaan! Met een simpel voorbeeld maken we dat duidelijk. Item X kost in de basisperiode SRD 1000 in Nickerie en SRD 1500 in PW (de index is dus in beide gevallen 100). Als op een gegeven ogenblik de index in Nickerie 140 is en de index in PW 110 dan kan men slechts concluderen dat er meer inflatie is geweest in Nickerie dan in PW, maar men mag geenszins concluderen dat Nickerie duurder is dan PW. (Nickerie: 140 => 1400 en PW 110=>1650). **Slechts vergelijkingen van prijsbewegingen zijn toegestaan en geen vergelijkingen van prijsniveaus!**

2- Procentuele veranderingen in de indexcijfers (=inflatie) worden berekend m b v de formule:
 $(I_t/I_{t-1}-1) \times 100\%$, met I_t de index in periode t.

3- Wat betreft de vorige en de huidige index geldt:

| Hoofdgroepen | | Factor |
|--------------|--------------------------------------|--------------|
| 1 | Voeding en Niet Alcoholische Dranken | 215.2 |
| 2 | Alcoholische Dranken en Tabak | 255.6 |
| 3 | Kleding en Schoeisel | 207.3 |
| 4 | Huisvesting en Nutsvoorzieningen | 328.3 |
| 5 | Woninginrichting | 182.0 |
| 6 | Gezondheidszorg | 199.0 |
| 7 | Transport | 194.1 |
| 8 | Communicatie | 201.1 |
| 9/10 | Recreatie, Cultuur en Onderwijs | 237.8 |
| 11 | Buitenshuis Eten | 177.4 |
| 12 | Overige Goederen en Diensten | 211.4 |
| TT | Totaal | 227.1 |

Voor elke hoofdgroep en het totaal geldt:

Van vorige index naar huidige index, vermenigvuldigen met: **100/Factor**

Van huidige index naar vorige index, vermenigvuldigen met: **Factor/100**

Technical Notes

1- Drawing conclusions, based on the indices, about differences in price level is not valid! A simple example will illustrate this: The base period price for Item X is SRD 1000 in Nickerie and SRD 1500 in PW (the index is 100 in both situations). If at any time the index in Nickerie is 140 and the index in PW is 110, the only conclusion can be that there has been more inflation in Nickerie than in PW, but users should not conclude that Nickerie is more expensive than PW (Nickerie: 140 => 1400 and PW 110 => 1650). **Only comparisons of price movements are allowed but not comparisons of price levels!**

2- Percent changes in indices (= inflation) are calculated using the formula:
 $(I_t/I_{t-1}-1) \times 100\%$, with I_t index in period t

3- As regards the previous and current index:

| Major Groups (Divisions) | | Factor |
|--------------------------|-----------------------------------|--------------|
| 1 | Food and Non Alcoholic Beverages | 215.2 |
| 2 | Alcoholic Beverages and Tobacco | 255.6 |
| 3 | Clothing and Footwear | 207.3 |
| 4 | Housing and Utilities | 328.3 |
| 5 | Household Furnishings | 182.0 |
| 6 | Health Care | 199.0 |
| 7 | Transportation | 194.1 |
| 8 | Communication | 201.1 |
| 9/10 | Recreation, Culture and Education | 237.8 |
| 11 | Food Away from Home | 177.4 |
| 12 | Miscellaneous Goods and Services | 211.4 |
| TT | Total | 227.1 |

For each major group (division) and the total the following applies:

From the previous index to the current index, multiply with: **100/Factor**

From the current index to the previous index, multiply with: **Factor/100**
