Trade Statistics

Suriname in Cijfers no 377 /2025— 03
Algemeen Bureau voor de Statistiek

september 2025
Prijs: Srd 300

Voorwoord

Handelsstatistieken (Statistieken van in- en uitvoer naar diverse gezichtspunten) zijn in Suriname altijd zeer belangrijk geweest, gegeven de prominente plaats die deze cijfers altijd hebben ingenomen in de zogenaamde Koloniale Verslagen (Verslag van het beheer en den staat der koloniën) over Suriname.

Van 1927 t/m 1944 publiceerde de voorloper van het Algemeen Bureau voor de Statistiek (ABS) “In- en uitvoer per goederensoort en per land”. Tussen 1954 en 1982 werden deze publicaties, zij het onregelmatig, ook opgenomen in de reeks “Suriname in Cijfers”. Die publicaties, die op den duur honderden pagina’s besloegen, werden stopgezet. Ook deed zich het verschijnsel voor dat de tijdigheid der statistieken niet was wat het wezen moest. Zo kwam bijvoorbeeld de Jaarstatistiek van de in- en uitvoer per goederensoort en per land over het kalenderjaar 1978 pas in september 1982 uit. Hierna kwam het ABS pas in januari 1989 wederom uit met een beperkte **In- en uitvoer 1980-1987**.”

Het gebrek aan betrouwbare, tijdige handelsstatistieken is geruime tijd een bron van onvrede van verschillende zijden tegen het ABS geweest. Met de uitvoering van het IDB-project tot institutionele versterking van het ABS en de introductie van het in dat kader ontwikkelde ABSAS systeem bij het ABS bestaat de mogelijkheid om zeer tijdig, hoofdzakelijk uit het ASYCUDA Systeem der Douane, handelsstatistieken te genereren. Zo kwam in juni 2002 de publicatie: **“Handelsstatistieken 1996-2001”** uit, die zeer goed werd ontvangen.

“Handelsstatistieken 2001-2006” werd pas in september 2007 uitgegeven, maar tussen december 2002 en september 2007 waren belangrijke handelsgegevens steeds te vinden in de publicatie “Basis Indicatoren”, welke normaliter 2x per jaar uitkomt. **“Handelsstatistieken 2004-2008”**, kwam in augustus 2009 uit en was binnen een zeer korte tijd uitverkocht, waardoor evident was dat er in een flinke behoefte werd voorzien. Vanaf juli 2013 is het ABS erin geslaagd (nu dus weer) om in oneven jaren de handelsstatistieken te publiceren.

Voor eventuele kritiek, alsook voor nadere uitleg kan men terecht bij het afdelingshoofd in opleiding van de afdeling Handelsstatistieken, Mw. Racine Satijong, Tel: 474861/473737 – tst 241.

ABS, september 2025

Drs. Guilliano B. Koornaar
Onderdirecteur Statistieken/ 2e plv.
2nd Deputy Director GBS

Preface

Trade Statistics (Statistics of Imports and Exports by various points of view) have always been important in Suriname, given the prominent place always provided to these data in the Colonial Reports (Report regarding the administration and the condition of the colonies) about Suriname.

From 1927 up to 1944 the forerunner of the General Bureau of Statistics (GBS) published “Imports and Exports per Commodity and per Country”. Between 1954 and 1982 these publications, be it irregularly, were also issued in the Series “Suriname in Cijfers”. These publications, which in due course consisted of hundreds of pages, were ceased. Also the timeliness of the pertinent statistics became an issue. E.g. the “Annual Statistics of Imports and Exports per Commodity and per Country for the Calendar Year 1978” was only published in September 1982. It was only in January 1989 that the GBS issued a publication with a drastically reduced number of headings **“Imports and Exports 1980-1987”**.

For quite a while, the lack of reliable and timely Trade Statistics has been a source of discontent with the GBS from various quarters. With the execution of the IDB-project: Institutional Strengthening of the General Bureau of Statistics and the introduction of the ABSAS System developed in that regard, it is now possible to generate timely Trade Statistics. These Trade Statistics are mainly based on CUSTOMS ASYCUDA System. In June 2002, the publication: **“Trade Statistics 1996-2001”** was issued, and it was received very well.

It was not until September 2007, that **“Trade Statistics 2001-2006”** was issued, but it should be noted that between December 2002 and September 2007, stakeholders could find Trade Statistics in the publication “Basic Indicators”, which is normally issued twice a year. **“Trade Statistics 2004-2008”** was issued in August 2009 and was sold out in record time, attesting to the fact that it really provided for users’ needs. As of July 2013 (current publication is a case in point) the GBS has succeeded in publishing Trade Statistics in odd years.

For criticism, if any, as well as for further explanation, one can contact the Head in training of the department of Trade Statistics, Ms. Racine Satijong, Tel: +597-474861/473737 – ext 241.

Inleiding

Handelsstatistieken hebben uitsluitend betrekking op de goederenstromen die de territoriale grens van een land passeren, dus op de in- en uitvoer van goederen. Deze statistieken zijn in feite secundaire statistieken omdat zij afkomstig zijn van de Douane uit het z.g. ASYCUDA World programma.

Betrouwbare en voldoende gedetailleerde handelsstatistieken zijn voor diverse gebruikers van grote betekenis. Enkele belangrijke redenen voor het samenstellen en gebruiken van handelsstatistieken zijn:

- Het bepalen van het algemeen economisch beleid inclusief fiscale, monetaire, structurele en sectorale problemen.
- Het ontwikkelen van een handelsbeleid met het buitenland. Met name bij het afsluiten van handelsverdragen en de monitoring, zijn juiste handelsstatistieken onmisbaar om te kunnen vaststellen wat het effect zal zijn op de exporten en het importvolume van een land.
- Ten behoeve van marktanalyse doeleinden voor zowel importeurs als exporteurs.
- De planning van de infrastructuur.
- Handelsstatistieken zijn een belangrijke input in de Nationale Rekeningen en de Betalingsbalans.

Introduction

Trade Statistics are solely associated with the movements of goods which cross borders, thus with imports and exports. These are secondary statistics, as a matter of fact emanating from the Customs, i.e. of the ASYCUDA World Program.

Reliable and sufficiently detailed trade statistics are of great importance for different users. Some of the principal reasons for compilation and use of trade statistics are:

- Establishing general economic policy, including fiscal, monetary, structural and sectoral issues.
- Development of trade policy with other countries Especially when establishing and monitoring trade agreements, proper trade statistics are indispensable for determining what the effects will be on exports and the volume of imports of a country.
- For the purpose of market analysis for importers as well as exporters.
- The planning of infrastructure.
- Trade statistics are an important input for National Accounts and Balance of Payments Compilation.

Deze publicatie “ Handelsstatistieken 2022 – tweede kw. 2025 gaat in op de gangbare concepten, definities en classificatiesystemen die ten grondslag liggen aan de samenstelling van de handelsstatistieken. De data voor de periode (01 januari 2022 tot en met 30 juni 2025) is zo gedetailleerd als mogelijk gepresenteerd in de vorm van tabellen en grafieken waarbij rekening gehouden is met de geldende internationale gedragscode “ Disclosure Prevention Policy” .

Teneinde tegemoet te komen aan zowel nationale als internationale verzoeken heeft het Algemeen Bureau voor de Statistiek (ABS), na langdurig onderzoek op veiligheid, de geldende internationale gedragscode “Disclosure Prevention Policy“ (DPP) van 3/80 verruimd naar 3/95. De 3/95 regel houdt in dat indien er minder dan 3 actoren opereren in een bepaalde branch of indien in een bepaalde branch 1(2) participant(en) voor 95% of meer de markt domineert (domineren) dat de gegevens door het Algemeen Bureau voor de Statistiek (ABS) **niet worden verstrekt**.

Classificatie systemen

Het vertrekpunt bij het samenstellen van handelsclassificatiesystemen is steeds geweest de gehanteerde tarief classificatie van de douane. De product classificaties gebaseerd op het “Geharmoniseerd Systeem” (HS) zijn gedetailleerder dan andere classificatiesystemen. De producten worden voornamelijk geclassificeerd op basis van materiaal bestanddeel en zijn onderhevig aan de veranderingen in lijn met de tarief vereisten.

De “ Standard International Trade Classification” (SITC) daarentegen is in het bijzonder geschikt voor breder economisch onderzoek, vergelijking tussen landen in de tijd. De SITC classificeert producten op basis van de mate van verwerking en het “ economisch” eindgebruik.

This publication” Trade Statistics 2022– second Quarter 2025 “ deals with the current concepts, definitions and nomenclatures underlying the structure of trade statistics. The data for the period (01 January 2022 up to 30 June 2025) is presented as detailed as possible in tables and graphs whereby the applied international policy is taken into account, the “Disclosure Prevention Policy” .

In order to meet both national and international requests the General Bureau of Statistics (GBS), after a intense research on precaution has expanded the international policy, from 3/80 to (Dpp) 3/95. The 3/95 rule means that if less than three participants are active in a certain branch or if in a certain branch there is (are) one (two) participant(s) who dominate (s) the market with a share of at least 95% that the data **cannot be released** by the General Bureau of Statistics (GBS).

Nomenclatures

The starting point by which nomenclatures are structured have always been the applied tariff structures of Customs. The “ Harmonized System” (HS) based product nomenclatures are more detailed than other systems. Products are classified mainly by their materials, and are subject to changes in line with tariff requirements.

The Standard International Trade Classification (SITC) on the other hand is particularly suitable for broader economic research and comparisons over time and between countries. The SITC classifies goods primarily by the stage of processing and economic end-use.

Naast de eerder genoemde classificatiesystemen zijn er nog andere gangbare classificaties, waaronder de Economische Goederen Groep (EGG). Ontwikkeld door de United Nations Statistical Division (UNSD) was deze classificatie voornamelijk bedoeld om handelsdata in SITC format te herleiden naar categorieën van eindgebruik, geschikt voor toepassing in de “Systems of National Accounts”(SNA). Het betreft de indeling in de voornaamste goederengroepen in de SNA, kapitaalgoederen, intermediaire goederen en consumptiegoederen.

Rapportage systemen voor handelsstatistieken

Landen kunnen bij het weergeven van hun importen en exporten kiezen voor de “General Trade System” of “Special Trade System”. Het verschil is dat bij “General Trade” goederen worden geregistreerd bij het binnenkomen dan wel verlaten van de nationale grenzen terwijl bij “Special Trade” goederen worden geregistreerd nadat deze door de douane autoriteiten zijn vrijgegeven voor deelname in het economisch verkeer dan wel voor export

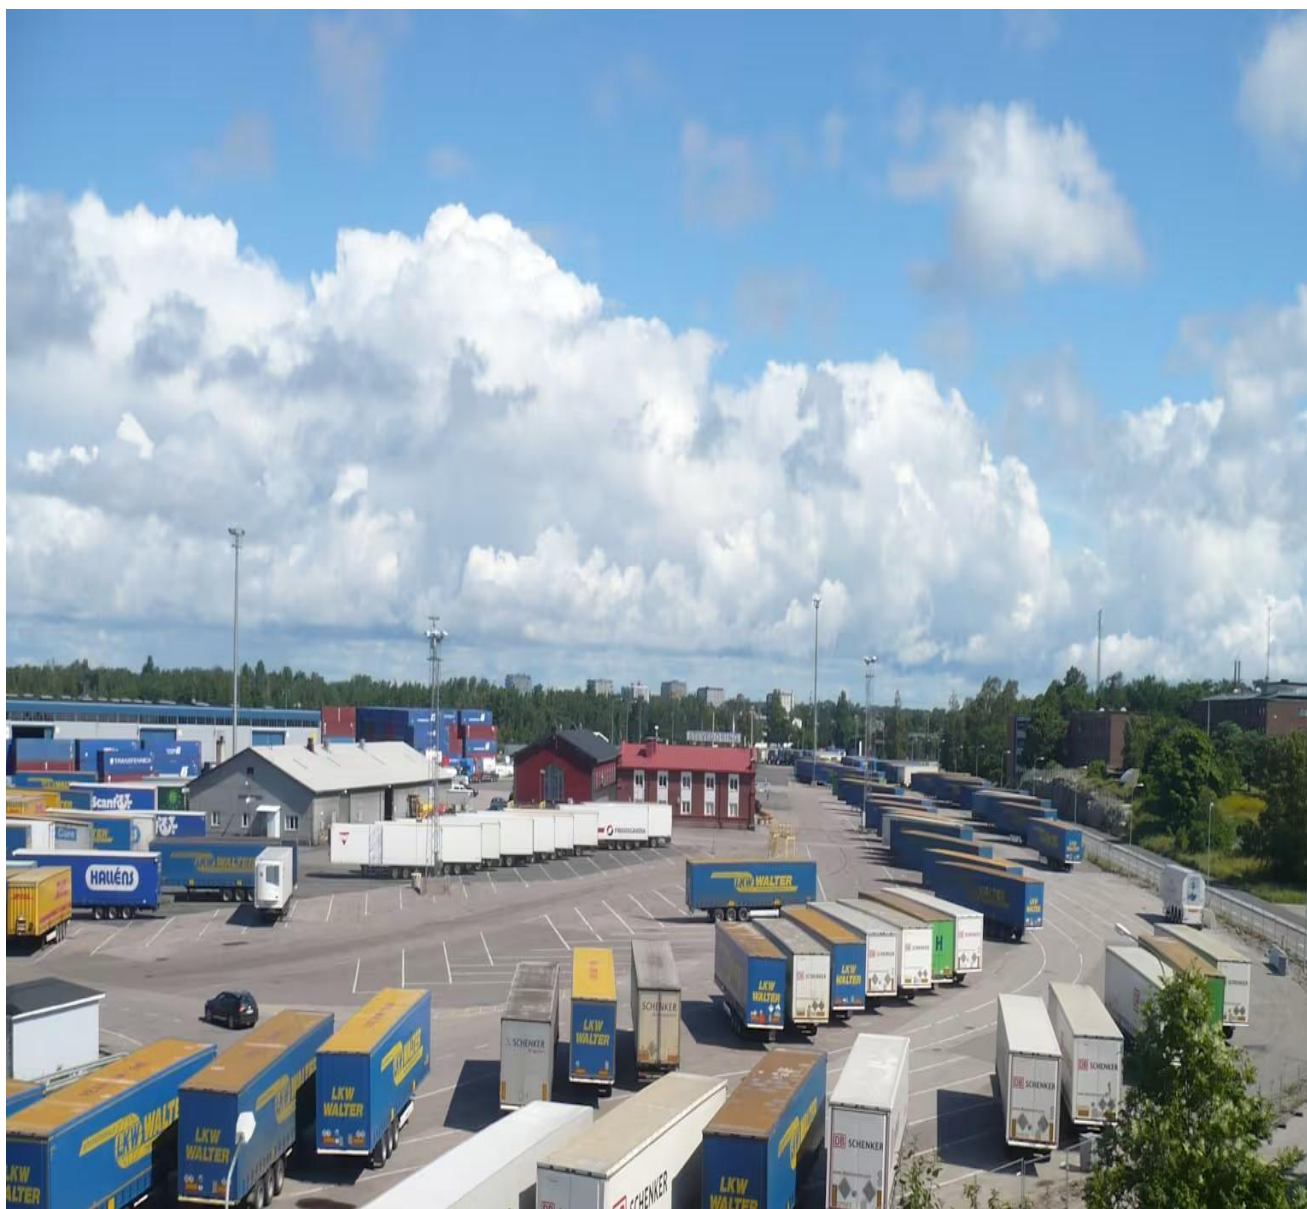

De “General Trade System” omvat de totale importen en totale exporten, inclusief weder-exporten. Ook zijn inbegrepen importen en exporten uit douane pakhuizen, vrijhandelszones en havens. Voor de importen en exporten gepresenteerd in deze publicatie: “Handelsstatistieken voor Suriname 2022 – tweede kwartaal 2025 hanteren wij de “General Trade System.”

Apart from the nomenclatures mentioned before, there are other current nomenclatures of which the classification by Broad Economic Category (BEC) is one. Designed by the United Nations Statistical Division (UNSD) this nomenclature was primarily meant for converting data in SITC format into end use categories suitable for application in the System of National Accounts (SNA). It concerns the division of goods in the main groups of the SNA: Capital goods, Intermediate goods and Consumption goods.

Systems for reporting trade

Countries may report data on imports and exports on the basis of “General Trade” or “Special Trade”. The difference is that in “General Trade” goods are recorded when entering or leaving the national territory, while in “Special Trade” goods are recorded when cleared through Customs for domestic use or for export.

The “General Trade System” includes total imports and total exports, including re-exports. Also included are imports and exports from customs warehouses and free zones and ports. For the import and export data presented in this publication: “Trade statistics for Suriname 2022 – second Quarter 2025” the “General Trade system ” is used.

Deel 1

Handelsbalans

Part 1

Trade Balance

Deel 1

Handelsbalans

Inleiding

Definitie: de handelsbalans is het verschil tussen de uitvoer en de invoer van een land (export - import).

De handelsbalans is in 2022, 2023 en 2024 positief. Zie tabel 1 en de grafieken 1a en 1b.

Tabel 2 bevat de cijfers over importen, exporten, weder- exporten, totale exporten en de handelsbalans op kwartaalbasis. De handelsbalans wordt weergegeven in grafiek 2a en in grafiek 2b importen en exporten.

Tabel 3.1.1 – 3.3.5 bevat eveneens de jaar- en kwartaalcijfers van de importen, exporten, weder - exporten en de handelsbalans naar de diverse handelsblokken over de jaren 2022- 2024. In tabel 3.4.1 – 3.4.2. zijn cijfers van het eerste en tweede kwartaal 2025 gepresenteerd. Het aandeel van elk blok in de totale exporten en importen wordt weergegeven in grafieken 3a t/m 3f.

De groepering van handelsblokken is een weergave van de relatieve belangrijkheid per groep voor Suriname.

Het verschil in belangrijkheid van de verschillende handelsblokken zal de lezer niet ontgaan.

Part 1

Trade Balance

Introduction

Definition: the trade balance is the difference between a country's exports and a country's imports (export – import).

The Trade Balance is positive in 2022, 2023 and 2024. See table 1 and graphs 1a and 1b

Table 2 contains quarterly figures of imports, exports, re – exports, total exports and trade balance. The trade balance is reflected in graph 2a and in graph 2b imports and exports.

Table 3.1.1 – 3.3.5 also contains even so the annual and quarterly Imports, Exports, Re-exports and Trade Balance figures by different Trade Blocks over the years 2022- 2024. In table 3.4.1 – 3.4.2 we present the first, and second quarter 2025 figures. The share of each trade block in the exports and imports is shown in graphs 3a up to 3f.

The grouping of Trade Blocks reflects the relative importance of each group for Suriname.

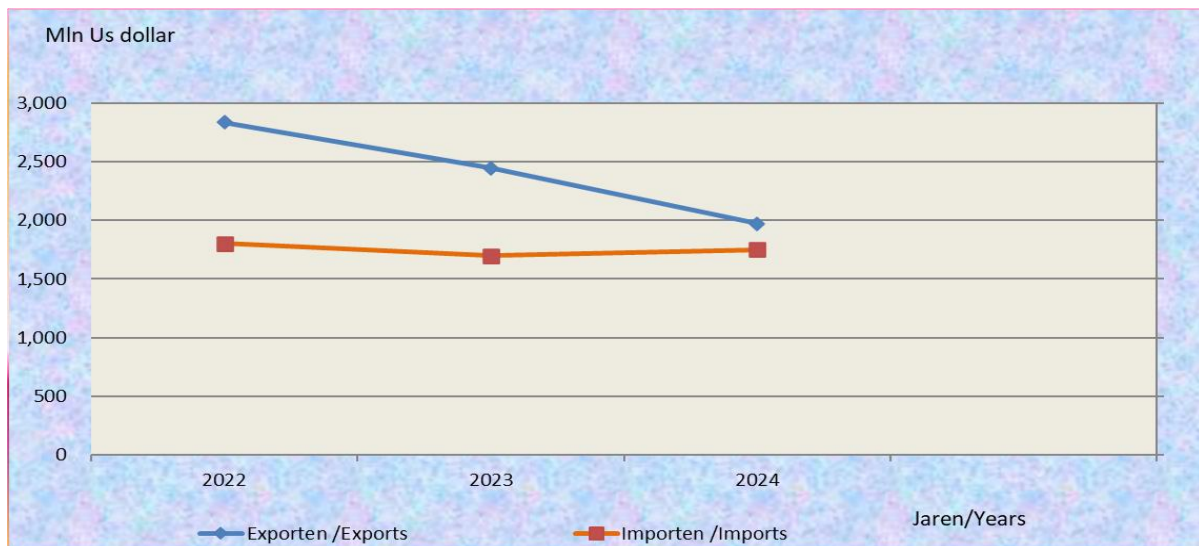

The difference in importance of the various trade blocks will not escape the reader.

Deel 2

Kwartaal en jaarcijfers per classificatiesysteem

Part 2

Quarterly and Annual figures by Classification System

Deel 2

kwartaal en Jaarcijfers per classificatiesysteem

Inleiding

Er zijn drie verschillende classificatie-systemen in gebruik: het Geharmoniseerd Systeem (HS), de “ Standard International Trade Classification” (SITC) en de Economische Goederengroep (EGG). Het Asycuda World systeem van de Douane werkt enkel met het Geharmoniseerd Systeem. In het EURO-TRACE systeem dat wij gebruiken is een correlatie tabel tussen de verschillende systemen ingebouwd, zodat informatie op basis van elk van de drie systemen kan worden verstrekt.

Voor de volledigheid worden in deel 2 van deze publicatie de jaar en kwartaalcijfers per HS groep van exporten, weder- exporten, importen en de handelsbalans weergegeven (tabel 4.1 tot en met 7.2). De jaarcijfers per SITC en EGG per hoofdgroep worden weergegeven in de tabellen 8 tot en met 15.

Voor elk systeem wordt een tabel met de omschrijvingen per code ingelast terwijl in de tabellen zelf enkel de groepscode verschijnen. Alle tabellen verder in dit deel van de publicatie volgen dezelfde presentatie: enkel de groepscode staan naast de cijfers vermeld.

Opmerking:

De goederen groepen 18, 19 en 20 zijn vanwege “Disclosure Prevention” doeleinden gegroepeerd.

Part 2

Quarterly and Annual figures by Classification System

Introduction

There are three different classification systems in use: the Harmonized System (HS), the Standard International Trade Classification (SITC) and the Broad Economic Categories (BEC).

The Customs Asycuda World System only uses the Harmonized System. The EURO - TRACE system that we use has a correlation table linking the three systems at the commodity code level so that statistics can be produced based on each classification systems.

For the sake of completeness in table 4.1 to 7.1 of part 2 we present annual and quarterly data on exports, re-exports, imports and the trade balance per HS group. The annual data per SITC and BEC are presented in table 8 to 15.

For each classification system the descriptions per code are inserted whereas in the tables only the group codes appear. All subsequent tables in this part of the publication are presented in the same way only the group codes appear next to the data.

Remark:

The commodity groups 18, 19 and 20 are grouped because of Disclosure Prevention.

**Geharmoniseerd Systeem
Harmonized System
(HS)**

Afd.	Omschrijving	Description
1	Levende dieren en producten van het dierenrijk	Live animals and animal products
2	Producten van het plantenrijk	Vegetable products
3	Vetten en oliën van dierlijke of plantaardige oorspong	Animal or vegetable fats and oils + their products, edible
4	Voedingswaren, dranken en tabak	Foodstuffs, beverages, spirits, tobacco and tobacco substitutes
5	Minerale producten	Mineral products
6	Chemische producten en aanverwante industrieën	Products of chemical or allied industries
7	Kunststof en rubber	Plastics, rubber and articles thereof
8	Huiden, leder, bont, artikelen daarvan, reisgoederen, dierlijke artikelen in stukken	Hides and skins, leather, art. thereof, travel goods, art. of animal cut
9	Hout, houtschool, kurk en artikelen daarvan, vlechtwerken, gevlochten manden en andere gevlochten waren	Wood, charcoal, cork, and art. thereof, plaiting materials, basket-& wicker ware
10	Pulp, papier en karton en artikelen daarvan	Pulp, paper, paperboard and art. thereof
11	Textielstoffen en – waren	Textiles and textile articles
12	Schoeisel, paraplu's, wandelstokken, hoeden, kustbloemen, artikelen van menselijk haar	Footwear, headgear etc., feathers, artificial flowers, art. of human hair
13	Steen, keramiek, cement, glas en glaswaren	Stoneware, plaster, cement, ceramic products, glass and glassware
14	Parels, edelstenen, halfedelstenen, edele metalen, bijouerie, munten	Pearls, precious stones & semi- precious stones, precious metals, imitation jewelry, coins
15	Onedele metalen en metalen voorwerpen	Base metals and articles of base metals
16	Machines, elektrotechnisch materiaal, elektrische apparatuur, geluids/video apparatuur	Machinery and appliances, electric equipment, audio and video equipment.
17	Transportmaterieel	Vehicles, aircraft, vessels and associated equipment
18	Optische, fotografische, meten en precisie instrumenten, muziekinstrumenten	Optical, photographic, measuring and precision equipment, Musical instruments
19	Wapens en munitie	Arms and ammunition
20	Diverse goederen en producten	Miscellaneous manufactured articles
21	Kunstvoorwerpen	Arts objects
22	Niet elders geclassificeerd	Not Elsewhere Classified

Deel 3
Handelsblokken per HS afdeling:
Jaar en kwartaalcijfers

Part 3
Trade Blocks by HS section:
Annual and Quarterly figures

Deel 3

Handelsblokken per HS afdeling: jaar en kwartaalcijfers

Inleiding

Het Geharmoniseerd Systeem in Suriname wordt afgekort “HS systeem”.

Gezien het belang van de handelsrelaties met handelsblokken, wordt in dit deel een aantal tabellen aangeboden waarmee een aandachtige lezer een goed beeld kan vormen van de handelsrelatie met elk van de huidige handelsblokken

Uit een zorgvuldige analyse kan ook worden afgeleid welke productgroepen voornamelijk met welke blokken worden verhandeld.

In de tabellen 16.1.1 t/m 21.4.2 worden de exporten, weder exporten, importen en handelsbalansen per handelsblok opgenomen. De tabellen combinaties zijn dezelfde voor de verschillende handelsblokken.

Om het aantal pagina's van deze publicatie beheersbaar te houden c.q. te beperken zijn geen tabellen opgenomen met data gesorteerd volgens het SITC Systeem of volgens de Economische Goederen groep Classificatie. Echter kunnen dergelijke verzoeken afzonderlijk worden opgevraagd bij het Algemeen Bureau voor de Statistiek.

Opmerking:

De goederen groepen 18, 19 en 20 zijn vanwege “Disclosure Prevention” doeleinden gegroepeerd.

Part 3

Trade Blocks by HS section: Annual and Quarterly figures

Introduction

The Harmonized System of Suriname is abbreviated to “HS system”.

In view of the importance of trade with the trade blocks we present a number of tables in this part of the publication. They reflect very clearly the importance of the relations with the respective trade blocks.

From careful analyses of the tables one can deduct the importance of specific product groups traded within the various trade blocks.

Tables 16.1.1 up to 21.4.2 contain exports, re exports, imports and trade balances per trade block. The table combinations are the same for the different trade blocks.

To keep the publication down to a manageable number of pages it was decided not to include tables with data sorted by SITC or BEC codes. Such tables can be produced by the GBS upon request of the user.

Remark:

The commodity groups 18, 19 and 20 are grouped because of Disclosure prevention.

Belangrijkste handelspartners

Inleiding

Exporten van hoofdgroep aluinaarde, niet - monetair goud en ruwe olie wegen zwaar door op de cijfers.

Bij de weder exporten valt er weinig te leren.

In tabel 22a en 22b staan de 15 belangrijkste import landen van 2022 t/m het 2^{de} kwartaal 2025 in orde van belangrijkheid per jaar.

De belangrijkste import landen gedurende 2022 waren Verenigde Staten van Amerika, Nederland, Trinidad en Tobago en China respectievelijk op de eerste, tweede, derde en vierde plaats. In 2023: Verenigde Staten van Amerika, Nederland, Trinidad en Tobago China. In 2024: Verenigde Staten van Amerika, Nederland, China en Trinidad en Tobago.

In tabel 22c en 22d staan de 15 belangrijkste export landen gedurende de periode 2022 – 2^{de} kwartaal 2025.

De top 4 export landen in 2022 waren: Zwitserland, Verenigde Arabische Emiraten, België en Trinidad en Tobago. In 2023: Zwitserland, Verenigde Arabische Emiraten, Guyana en Verenigde Staten van Amerika. In 2024: Verenigde Arabische Emiraten, Zwitserland, Guyana en Verenigde Staten van Amerika.

Part 4

Most Important Trading partners.

Introduction

Exports of main group alumina non- monetary gold and crude oil dominate the figures.

The Re-Exports are really insignificant.

Table 22a and 22b show the 15 most important import countries over the years 2022 up to 2nd Quarter 2025 in order of importance.

The most important import countries during 2022 were United States of America, Netherlands, Trinidad and Tobago, and China respectively on the first, second, third and fourth place. In 2023: United States of America, Netherlands, Trinidad and Tobago and China. In 2024: United States of America, Netherlands, China and Trinidad and Tobago.

Table 22c and 22d show the most important 15 Countries for export during the period of 2022 – 2nd Quarter 2025.

The top 4 export countries in 2022 were Switzerland, United Arab Emirates, Belgium and Trinidad and Tobago. In 2023: Switzerland, United Arab Emirates, Guyana and United States of America. In 2024: United Arab Emirates, Switzerland, Guyana and United States of America.

Tabel 22a: Belangrijkste importlanden: jaarcijfers 2022 – 2024, in US dollars.

Deel 5

Belangrijkste exportgroepen

Part 5

Most Important Export groups

Deel 5

Belangrijkste exportgroepen

Inleiding

Tot en met het eerste kwartaal 2016 waren onze belangrijkste export produkten: aluinaarde , niet- monetair goud en ruwe olie. In het eerste kwartaal van 2016 vond de laatste verscheping plaats van aluinaarde. De “ DPP regel” maakt het onmogelijk tabellen te publiceren met slechts twee export produkten. Aangezien mijnbouw en aan mijnbouw gerelateerde produkten een belangrijke rol spelen in onze economie is besloten een tabel te publiceren met gecombineerde exporten van aluinaarde (HS code 2818200), niet-monetair goud (HS code 71081210 en 71081300), ruwe olie (HS code 27101940 en 27101970), steenslag (HS code 2517100) en cement (HS code 25232910) en deze zijn opgenomen in tabel 23.

De overige exporten worden vervolgens uitgesplitst in tabel 24 naar de klassieke sectoren. Rijst (HS sub groep 1006), overige landbouw produkten (HS hoofdstuk 06 t/m 14 minus sub groep 1006), vis en garnalen (HS hoofdstuk 03), hout en houtwaren (HS hoofdstuk 44), Drank (HS hoofdstuk 22) en overige.

Part 5

Most Important Export groups

Introduction

Up to the first quarter 2016 our most important export products were: alumina , non- monetary gold and crude oil. In the first quarter of 2016 we had the last shipment of alumina. The “ DPP rule makes it impossible for us to publish tables with only two products. Because mining and mining related products are very important for our economy we decided to produce a table with combined exports of alumina (HS code 2818200), non – monetary gold (HS code 71081210 and 71081300), crude oil (HS code 27101940 and 27101970), concrete broken stone (HS code 2517100) and cement (HS code 25232910) which are in table 23.

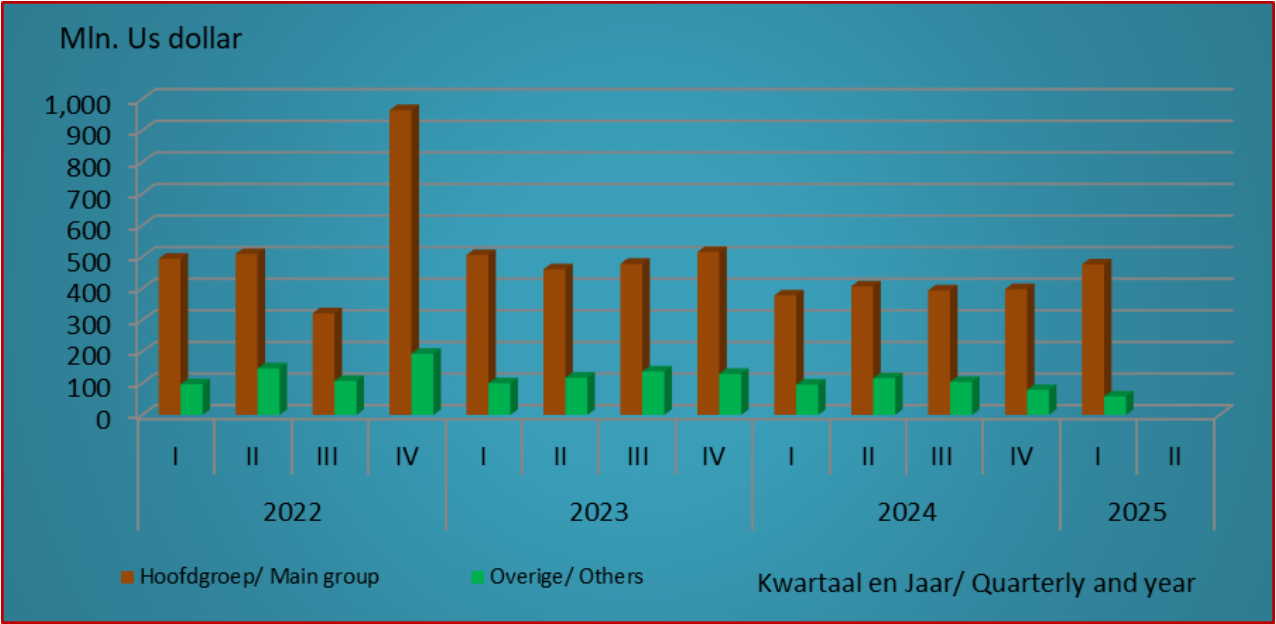

The other exports in table 24 are split up into the classical sectors. Rice (HS sub group 1006) other agriculture products (HS chapters 06 up to 14 minus sub group 1006), fish and shrimps (HS chapter 03), wood and wood products (chapter 44),beverages (HS chapter 22) and others.

**Tabel 23: Kwartaal en jaar exporten van hoofdgroep(Aluinaarde ,niet - monetair goud, ruwe olie, steenslag en cement)

Deel 6

Samenvatting van de importen

Part 6

Summary of the Imports

Deel 6

Samenvatting van de importen

Inleiding

In een poging om meer inzicht te krijgen in de importen werden de transactiegegevens gegroepeerd in vier categorieën: investering – en verwerkingsgoederen, consumptie goederen, duurzame huishoudgoederen en gereedschap, en overigen. Deze groepering vond voornamelijk op het niveau van de HS hoofdstukken plaats en is dus slechts een zeer ruwe benadering van de realiteit. In feite zou de aggregatie op het niveau van de individuele goederen moeten geschieden, maar zelfs daar is niet altijd duidelijk waarvoor de goederen uiteindelijk bestemd zijn.

Ter verduidelijking worden de bijzonderheden van de groepering in een afzonderlijke lijst in de publicatie opgenomen. (zie blz.149).

Tabel 25 bevat de kwartaalcijfers voor de genoemde vier hoofdgroepen. Dit hebben we ook in kaart gebracht in grafiek 5.

Tabel 26 bevat kwartaalcijfers en bedragen, van de uitgesplitste importen van investering - en verwerkingsgoederen.

Tabel 27 geeft de kwartaalcijfers voor de importen van vervoersmiddelen.

Tabel 28 bevat een uitsplitsing van de importen van consumptiegoederen.

In tabel 29 hebben we de importen van drank verder uitgesplitst.

Tabel 30 geeft cijfers voor de importen van duurzame huishoudgoederen.

Part 6

Summary of the Imports

Introduction

In order to get some more insights in the imports, we grouped the transactions into four categories: investment and processing goods, consumer goods, durable household goods and tools, and others. This aggregation system took place mainly at the level of HS chapters and is only a very rough approximation of reality. Such an aggregation should really be effectuated at the commodity code level, but even this would be inaccurate because the purpose of end use of goods is not necessarily reflected in the commodity coding system.

The actual basis of aggregation is included separately in this publication. (see page 149).

Table 25 contains data for the four main groups. This is also shown in graph 5.

Table 26 shows quarterly values of imports divided into investment goods and processing goods.

Table 27 shows the quarterly figures of means of transportation.

The breakdown of the consumer goods is shown in table 28.

Table 29 contains a further breakdown of the imports of beverages,

Table 30 contains the imports of durable household goods.

Aggregatiegegevens grotendeels per HS hoofdstuk
Aggregation details roughly by HS chapter

1 Investerings - en verwerkingsgoederen / Investment and processing good

- * Investeringsgoederen / investment goods: 73, 84 (deels/ partly), 85 (deels / partly), 90
- * Bouwmaterialen / Building materials: 25, 38, 39, 44, 45, 68 -70
- * Grondstoffen / Raw materials: 13, 14, 26, 28, 29, 32, 36, 46, 47, 72, 74 – 76, 78 – 81
- * Landbouw inputs / Agricultural inputs: 12, 23, 31
- * Vervoermaterieel / Transportation equipment: 86 – 89

2 Consumptiegoederen / Consumer goods

- * Voeding / Food: 2, 3, 4, 7 – 11, 15 – 21, 35
- * Drank en tabak / Beverages and tobacco: 22, 24
- * kleding en schoeisel / Clothing and footwear: 41 – 43, 50 – 56, 60 – 67
- * Lichaamsverzorging / Body care: 33, 34
- * Speelgoed / Toys / 95
- * Papier en boeken / Paper and books: 48, 49
- * Pharmaceutische producten / Pharmaceutical products: 30
- * Brandstoffen en rubber / Feuls and rubber 27, 40
- * Overige / Others: 5, 6

3 Huishoudgoederen en gereedschap / household appliances and tools

- * Meubelen ect.../ Furniture and fittings: 57, 58, 59, 94
- * Electr. Apparaten / Electr. Appliances: 84.15, 84.18, 8450.1110, - 1210 – 1910 – 2010,
85.16 – 85.25, 85.27 – 85.29
- * Gereedschap / Tools: 82, 83
- * Diverse apparaten en voorwerpen / Various equipment and objects: 37, 91, 92, 96, 97

4 Overige goederen / Other goods

- * Juwelen / Jewellery: 71
- * Levende dieren / Live animals 1
- * Overige / Others: 93, 99

Dit is slechts een ruwe benadering. Er zijn een aantal hoofdstukken die naar een lager niveau

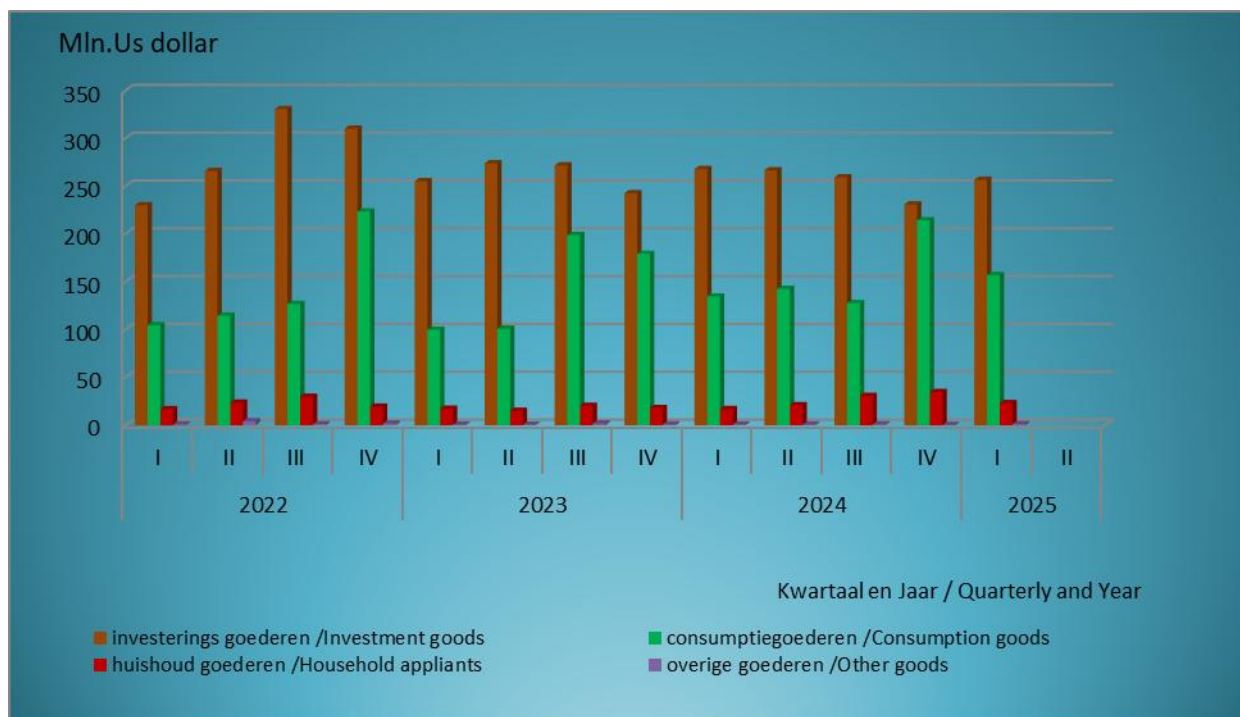

(goederen code) zouden moeten worden uitgesplitst om een beter beeld te krijgen.
De 3/95 regel - vormt dan echter een probleem.

This is only an approximation of a grouping. A number of chapters should be split up at the level of the commodity code, but this creates problems with the 3/95 rule of Confidentiality.
